

CHAMELEON. THE SHOWER- & COMMODE- CHAIR THAT COMES WITH ITS OWN SUITCASE.

The first all-in-one chair

Large rear wheels make it easy to push the chair or propel yourself.

Chameleon is easily packed into its suitcase

FACTS

Environmentally sound materials

Chameleon is produced exclusively from environmentally responsible materials: Aluminium and plastics, which can be recycled without any environmental impact. No types of PVC have been used.

Tested by the
"Danish Centre for Technical Aids
for Rehabilitation and Education"

Chameleon has been tested and approved by an independent authority according to the following European standards: ISO 7173, prEN 10 535 and prEN 12 182.

User weight: Max. 120 kg (264 lbs.)

Chameleon w. 4 legs with rubber sockets:		
Width:	55 cm	22"
Depth:	71-74 cm	28-29"
Height:	81-91 cm	32-36"
Seat Height:	42-52 cm	17-20"
Weight:	7,1 kg	15,6 lb.

THE CHAIR THAT ADAPTS TO THE NEEDS OF THE USER

Chameleon

- Easily assembled and dismantled without tools
- Weighs only 9,9 kg (21,8 lb.) suitcase included
- Passes through a standard-width toilet door
- Height-adjustable
- Discreet design, looks like a normal chair
- Constructed in environmentally sound materials: Aluminium & recyclable plastics
- A chair which meets most needs, on holiday, business trips and on family visits

To travel is to live.... For people with a mobility problem, however, it has till now been difficult to enjoy holidays, visits to friends and family as well as business travel, because very few buildings are constructed in such a way as to allow wheelchair users access through standard bathroom- & toilet doors.

This has led to humiliating situations with commode chairs being used in corridors, holidays confined to accessible hotels, etc.

More importantly, many have given up going on holiday and on family visits altogether in order to avoid trouble and embarrassing situations in connection with their personal hygiene.

Chameleon is the first Shower- & Commode Chair developed specifically for travelling. The fact that it comes with its own suitcase makes it the perfect travel companion.

Passing through a standard-width toilet door

With its maximum width of just 54 cm (21"), Chameleon easily passes through a standard-width toilet door. The height of the seat can be adjusted to suit the needs of the user as well as the height of the toilet bowl at the destination. It is also suited for showering.

Travel light

Chameleon was developed to meet wheelchair users' need for having just one chair, which is equally suited for use at home and "on the road". It is therefore easy to dismantle without tools and pack into its own suitcase. The chair and the suitcase - conform with the maximum measurements for cabin luggage on commercial aircraft and weigh no more than 9,9 kg (21,8 lb.).

Discreet and flexible

Chameleon is designed as a modular system, allowing the user to adapt to changing needs, from a shower & commode chair to a lightweight transport chair. Furthermore, for reasons of discretion it was deliberately designed in such a way that the padded seat makes it look like other lightweight chairs. Like this, nobody will suspect that the chair can also be used for the personal hygiene.

For private users as well as nursing homes

Chameleon is ideal both for the busy wheelchair user, who often travels privately and on business, as well as for nursing homes, where the residents need access to a flexible solution to the problems connected to the personal hygiene when visiting their family or going on vacation.

Chameleon as a commode chair, in the shower cabin and travelling as a rucksack.
